## GUIDE RAILS, SNAP-ONS, J-LEGS, RAIL COVERS, & OTHER EXTRUSIONS

Slideways offers a complete line of UHMW guide rails. We keep it stocked in lengths of 10' and 20' with stainless steel mounting sleeves. When you choose a Slideways guide rail, you get these benefits:

- Meets FDA, USDA, and pharmaceutical requirements
- Can be used as a guide rail, belt support or wear strips
- Static dissipative and oil-filled UHMW rails available
- Fits commercially available clips and brackets

*We have the ability to etch your name on rail*

## CHAIN & BELT GUIDES

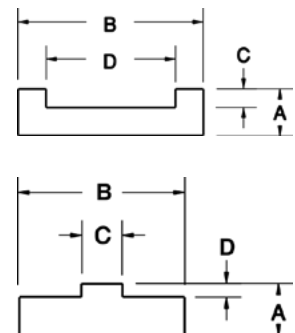

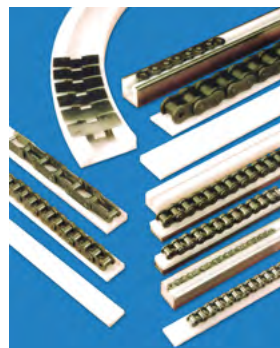

UHMW guides extend belt life, reduce noise and friction.

Belt Guides are available in standard sizes, or we can produce custom sizes to meet your needs.

- In channel style, raised track, and as a channel with a raised track.
- Inserts for mounting channels.
- Mounting channels in galvanized or stainless steel.

## TRACKS & GUIDES FOR CHAIN & PLASTIC MODULAR BELT

---

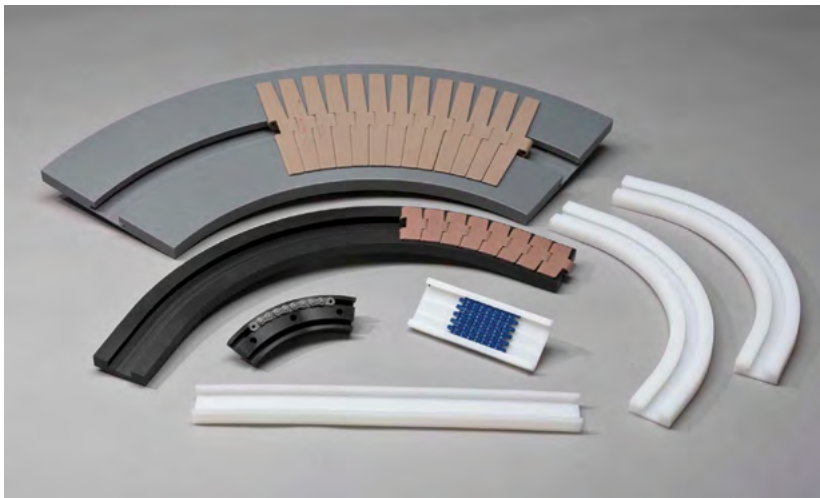

*Custom multi-lane SlideTrax 180° curve*

**How to Measure  
Curves**

**SlideTrax  
Collections**

*Curves custom made to your print or from physical sample*

## PRECISION MACHINING

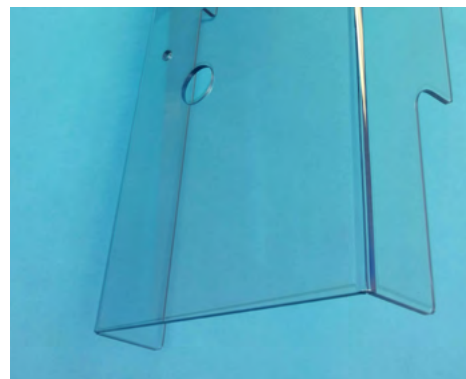

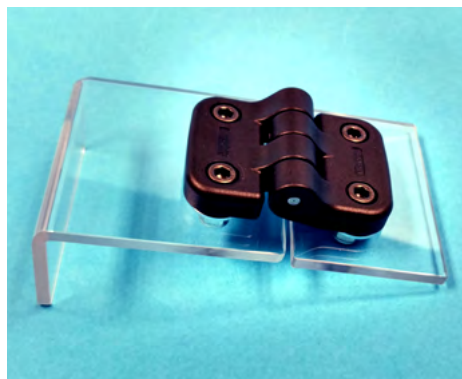

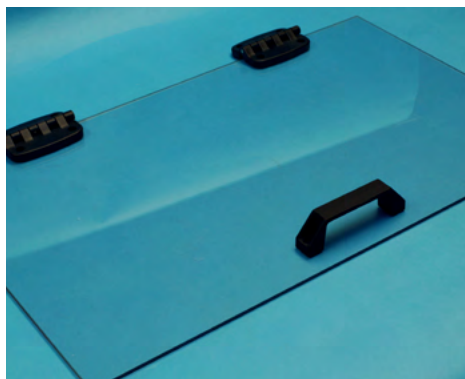

---

*Tighter tolerance, higher precision packaging machinery parts*

## CUSTOM GUARDS & PANELS

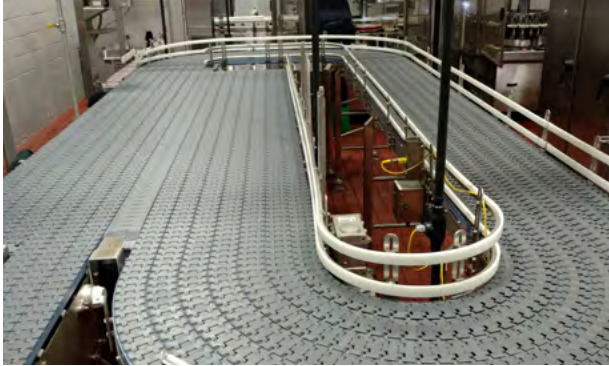

---

*Lexan® and Acrylic panels made to order for OEM and replacement applications*

## SOLUTIONS IN THE FIELD

*Food Processor in Massachusetts that uses Slideways guide rail, SlideTrax corner tracks, and table top chain.*

*Cheese Processor in California that uses Slideways USDA Dry Lubricated Wear Guides.*

*OEM conveyor builder in Wisconsin building bakery system that uses UHMW belt supports, pusher blocks, pusher support, return guide, and stainless steel levelers.*

*Corn packing line in Florida consisting of custom machined UHMW straight and corner tracks, guide rails, and brackets for a plastic modular belt.*

### THE **SLIDEWAYS®** **ADVANTAGE**

Slideways is a valuable partner even for those with in-house machining capabilities. We work from your prints or reverse engineer parts from provided samples.

#### **Cleanliness**

We only machine plastic. All our CNC machinery is specifically tooled for fabricating plastic components. There is no chance of metal contamination, which is especially important in food processing and packaging applications.

#### **Efficiency**

Our specialty is designing and machining complex, custom plastic parts. Our engineers and machinists are experts in the niche "machined plastics" industry enabling you to concentrate on your core competencies

of design and metal fabrication. We work from your specs with a vast understanding of conveyor belts and chains, state-of-the-art technical machines, and knowledge of various plastic materials.

#### **Inventory**

We stock raw plastic materials; no need to worry about planning, stock levels, or the physical footprint of inventory at your location.

#### **Delivery**

We acknowledge your order with a ship date that keeps your scheduling needs in mind. We pride ourselves in just-in-time delivery with a 2-3 week standard lead-time from order to shipment.
