

TIVAR[®] DRYSLIDE

DRYSLIDE; Low Friction, Longer Life

TIVAR DRYSLIDE Product Profile:

- Self Lubricating
- Reduces Noise
- Corrosion Resistant
- No moisture absorption

Modified with special lubricants, DRYSLIDE has the lowest coefficient of any of the TIVAR products.

The enhanced coefficient of friction and anti-static properties make DRYSLIDE an Excellent performer in dusty environments. Even damp boxes and shrink-wrap won't stick to DRYSLIDE. In addition, enhanced surface lubricity won't mar packaging or Products, but allow them to move freely without jamming from dirt, grit or static build-up.

Technical Data:

Coefficient of Friction:	.08
Water Absorption:	Max 0.01%
Tensile Strength:	4800 psi
Compressive Strength	2900 psi
Limiting Pressure Velocity	2000 psi-ft/min
CTE, Linear @68°F	190 micro inch/in-°F
